We grow Glads primarily for cut flowers, but each season we have a few bulbs beyond our requirements. Herewith we list a few varieties most of which are the cream of cut flower Glads. These bulbs range in size from 1½ to 2 inches in diameter. They are high crowned, clean and free from thrips.

Glads are one of the easiest of all flowers to grow. A few dozen bulbs planted at two to three weeks intervals will give you cut flowers from July until frost.

Something Worth Considering

We do not attempt to undersell everybody. To do so would mean to do our work for nothing. It is our aim to produce the finest stock possible and price it at a figure which represents a fair outlay to you for what you get, and a reasonable profit to us on our product. The element of gamble with our stock and service is practically zero.

ANNOUNCEMENT

An analysis of our business indicates that dahlia plants and rooted cuttings have been profitable, whereas root production is less remunerative. Our cut flower and perennial business is not only profitable but its steady growth demands more room and time, so after careful consideration it was deemed sound judgment to materially reduce our dahlia acreage and discontinue the production of dahlia roots for Spring sales. In conformity with this decision it was necessary to close out our entire root stock. This accounts for the absence of root quotations in this list.

Our business policy will remain unchanged.

We thank you for your generous patronage in the past, and will look forward to serving you as usual with plants and rooted cuttings.

Gratefully,

MR. & MRS. F. W. GALLOWAY.

DAHLIA ARISTOCRATS

WASHINGTON KY.

The steady growth of our perennial and cut flower business has gradually demanded more time and garden space, and having proved to be more profitable than Dahlia root production, it was deemed advisable to alter our planting plans for the coming season so as to permit only 2,500 to 3,000 hills. Such a drastic reduction in dahlias allows room for only the choicest of the newer introductions, practically all of which will be available entirely in green plants. This means that our entire root stock must be closed out before the planting season. It was our purpose to sell this stock as a whole or in sizeable lots, but we still have several thousands of good roots on hand. Ruthless price cutting is generally frowned upon, but we feel that those who have been loyal to us cannot be ignored when a possible break is in the offing. Accordingly it was decided to give our regular customers an opportunity to buy dahlias cheap.

This stock is field grown, carefully culled and is of the same high grade we usually offer.

It is guaranteed to be true to name and to grow.

It is to our interest to have the entire stock disposed of before the busy season arrives, and we may yet sell large blocks where reasonable terms can be reached. Accordingly, we make two suggestions: (1) Wherever desirable name second choice, to avoid correspondence, delay and possible disappointment. (2) As soon as you decide what is wanted, order immediately. A cash deposit of 25% will reserve your order for shipment any time up to May 1st.

TERMS—Please specify if substitution is permissible if out of variety ordered. Orders will be actually assembled as received and set aside until shipping date.

Orders of \$2.50 or more will be shipped prepaid.

Orders for less than \$2.50 must be accompanied by 25% extra for transportation, or we will ship Express Collect if you prefer. All stock herein offered subject to prior sale.
